

Connecting the Dots with CMT

The Perfect Partnership for Achieving CCBHC-type Success!

Aug 12, 2016 12:00 EST

Care Management Technologies (CMT) and Relias Learning (RL) are partnering to offer critical resource development for community-based behavioral health agencies that will meet CCBHC-type programming goals. CMT is a population health management organization that utilizes data analytics for optimum healthcare outcomes and RL is an online learning organization that provides essential training to positively affect behaviors throughout the healthcare and public safety systems.

The Substance Abuse and Mental Health Service Administration (SAMHSA) has set out specific criteria for states and community providers under the Certified Community Behavioral Health Centers (CCBHC) initiative. This clarifies that community providers understand that concepts of CCBHC are crucial for all to utilize for evidence-based services and optimum outcomes.

With SAMHSA, the service array is deliberate for CCBHC sites. CCBHCs provide the comprehensive array of services that are necessary to create access, stabilize people in crisis, and provide the necessary treatment for those with the most serious, complex mental illnesses and addictions. CCBHCs also integrate additional services to ensure an approach to health care that emphasizes recovery, wellness, trauma informed care, and physical-behavioral health integration.

Behavioral health organizations and state agencies realize, though, that while SAMHSA incentivized the re-design of these various concepts in a specific pattern that the future of behavioral health service delivery will fully encompass these and other vital areas and concepts. As such, CMT and RL have individually and now collaboratively designed essential resources for the development and implementation of CCBHC-type services and supports.

Through crucial partnerships, such as those with the National Council, CMT and RL have utilized nationally and internationally recognized clinicians and consultants to initiate opportunities for state agencies and community providers to significantly 'move the needle' in meeting CCBHC-type program goals. The overarching goals of CCBHC sites are stated in the areas of staffing, availability and access to services, care coordination, governance and accountability, the scope and range of services, and quality and other reporting. As such, CMT and RL have these and other vital areas available to support community providers in actionable and meaningful ways.

Please refer to the National Council's CCBHC Crosswalk for more information on the supports available for state agencies and behavioral health agencies to meet CCBHC-type program goals.
