Virginia Governor Aligns with CMT's Innovative, Technology-based Data Analytic Value Proposition

In a sweeping and bold move, Virginia Governor, Terry McAuliffe, signed an Executive Order leveraging the use of data analytics among state agencies. "Smarter use of data and data analytics will help state agencies be more efficient in administering programs, and it will enhance our stewardship of the public funds entrusted to the Commonwealth," Governor McAuliffe said. "It also will allow state government to more efficiently and effectively address issues of concern to our citizens, including public health, public safety and education."

Further, Secretary of Technology Karen Jackson added, "solid data and analysis of that data is essential to making sound decisions that are in the best interest of the citizens of the Commonwealth. The actions in this directive will empower the Commonwealth to be more strategic in how we examine, leverage and protect data across agencies."

Care Management Technologies (CMT) concurs and applauds Virginia on this strategic decision. The value added through data analytics to public and private agencies alike is striking – as Virginia's Executive Order points towards. CMT has 15 years in population health management through data analytics and clinical expertise. CMT's innovative, technology-based decision support resource is a valuable asset in the world of behavioral and integrated healthcare. As such, CMT and its *ProAct* tool meet the goal of Virginia's Executive Order as well as that of CMS' Triple Aim in healthcare delivery.

In concluding the Executive Order, Virginia also noted, "Commonwealth data collection and analysis activities shall focus on enhancing government transparency, streamlining business processes, increasing operational efficiency and effectiveness, and minimizing duplication and overlap of current and future systems development." CMT and the State of Virginia...Moving Ahead through the enhanced use of data analytics.

To learn more about how CMT's advanced data analytics can help your organization move towards the forefront of population health management and to lessen clinical and financial risk, contact John Tote, VP, Strategic Business Development at 919-219-3944 and visit CMT online at www.cmthealthcare.com.
