Care Management Technologies Announces
New ProAct Data Integration Framework

Morrisville, NC [November 11, 2015] - Care Management Technologies (CMT), a population health data analytics company that specializes in behavioral health announces their newest data solution—the CMT *ProAct* **Data Integration Framework**. CMT's *ProAct* **Data Integration Framework** provides structured access to the clinical and administrative data aggregated and analyzed for CMT's *ProAct* evidence-based and clinically driven analytics. Customers have the ability to integrate data from a variety of data sources and standardize their data for data visualization and exploration as well as self-service reporting and report automation in addition to access to CMT's over 250 prebuilt, evidence-based analytic rules.

"CMT's *ProAct* **Data Integration Framework** allows clients to bring together rich clinical data from multiple data sources into a common data structure that can function as a centralized data warehouse while providing seamless integration with existing internal warehouse or external data sharing networks," said Michael Croghan, Chief Technology Officer at CMT.

CMT's first customer to use the *ProAct* **Data Integration Framework** is Macomb County Community Mental Health, (MCCMH), a Michigan PIHP capitated behavioral health organization serving over 120,000 Medicaid consumers.

"CMT's *ProAct* provides the data integration and analytics capabilities that are key to achieving MCCMH's goal of becoming a CCBHC /Center of Excellence for population management, shared savings and value-based performance," says John Kinch, MCCMH Executive Director.

"We are pleased that MCCMH has chosen to leverage their investment in *ProAct* Analytics to easily establish and maintain an integrated data warehouse solution. This advancement will allow MCCMH to leverage all data, claims and clinical data, while simultaneously participating in a multitude of other registries, databases, and exchanges, supporting their strong interest to be an early adopter of the Certified Behavioral Health Center model. Hats off to MCCMH for their leadership in taking this advanced technological step to leverage their data and CMT's capabilities to support their business and clinical initiative to be a Center for Excellence," added Carol Clayton, PhD, CEO at CMT.

About Care Management Technologies

Care Management Technologies (CMT) is a firm with broad expertise and extensive experience in behavioral health and advanced technologies. It is this combination of skills that has enabled CMT to develop proprietary health information technology that is behaviorally-health focused and unique in the marketplace. Over the past twelve years, CMT has developed an extensive array of evidence-based rules that promote improvements in care – both behaviorally and medically. CMT works with payers and providers across the US. To learn more, please visit http://cmthealthcare.com.

About Macomb County Community Mental Health (MCCMH)

Macomb County Community Mental Health, guided by the values, strengths and informed choices of the people they serve, provides quality services which promote recovery, community participation, self-sufficiency, and independence.

MCCMH programs and services are supported and funded by the Michigan Department of Community Health and the Macomb County Board of Commissioners, and are administered by the Macomb County Community Mental Health Board.
