Missouri Coalition for Community Behavioral Healthcare Wins National Award

The National Council for Behavioral Healthcare presented the Missouri Coalition for Behavioral Healthcare its prestigious 'Science into Practice: Systems Change and Best Practices' award at its Awards of Excellence event in Las Vegas on March 8, 2016.

The Missouri Coalition for Community Behavioral Healthcare, who was nominated by long-term analytic partner, Care Management Technologies, represents community-based mental health and substance use disorder providers throughout the state. Additionally, the Coalition operates a 24/7/365 call center to assist those in more immediate need.

Care Management Technologies (CMT) has been providing analytic and other services to the Coalition for more than a decade. In doing so, CMT has assisted the Coalition in their ongoing initiatives to provide the citizens of Missouri with mental health and addictive disease disorders quality, comprehensive care in their own communities. CMT proudly salutes the Missouri Coalition for Behavioral Healthcare for its significant, community contributions and in winning this most-prestigious award.

CMT is a healthcare decision support organization. CMT offers a range of vital services and supports to assist payers and providers achieve maximum care for those served delivery while obtaining resource maximization through the use of healthcare data analytics especially in the arena of behavioral health.
